COMPLETE ENTRY DOOR SYSTEMS
Commitment to quality, value, and service.
Since 1890, the BROSCO name has represented our commitment to quality, value and service. We believe in providing low-maintenance, environmentally friendly, energy efficient millwork products engineered for our rugged Northeast weather and our regional architectural preferences. We are proud to extend this tradition for every product we distribute.
Prefinished Entry Units – Fiberglass like you’ve never seen before.

ELEGANCE. CRAFTSMANSHIP. ENDURING BEAUTY.

These qualities set the Luxury doors apart from all the rest. Fiberglass crafted with such care and determination it is nearly impossible to distinguish from a real wood door, yet is designed to stand up to harsh climates and extreme exposures.
Architectural Mahogany doors are offered in distinct designs to coordinate with any architectural style. Each door is designed with raised moulding for added richness and details like correctly registered Mahogany grain, wider panels and more glass area.

Built with a classic profile, the Architectural Oak doors are designed to emulate the look and feel of a true Oak wood door—without all the maintenance. Each door is designed to conform to classic architectural specifications.

Architectural plank fiberglass doors are ideal for evoking a sense of old world or country charm. Designed with the modern convenience of low maintenance, they are a perfect fit for any home.

Simple lines inspired by nature are the hallmarks of the flat-panel Craftsman style. These beautiful geometric glass designs cast intricate patterns of light. Handcrafted glass honors the Craftsman reverence for fine quality materials.

Craftsman Doors shown with optional shelf.
With realistic detailing and a wide variety of styles, Design-Pro Oak is a beautiful, energy efficient choice for any home.

JELD-WEN Smooth-Pro Fiberglass doors are an affordable, energy efficient choice. All JELD-WEN doors are designed to be attractive, enduring and worry-free.
These doors feature a tough 24-gauge galvanized steel skin that showcases the JELD-WEN exclusive beaded sticking profile. They’re available with an optional steel edge that delivers added security.

JELD-WEN Gladiator Steel doors include construction-grade steel doors with true, durable 25-gauge steel skins.

Whether you live along the coast, in areas prone to severe weather, or in any area where impact resistance and heightened security are important, the JELD-WEN Entry Door System can provide door units that conform to the stringent Miami-Dade County building codes.

Just as building codes may impact coastal installations, they also call out specifics regarding Fire-Rated openings. The JELD-WEN Entry Door System offers both 20-minute and 90-minute rated doors in several designs.
The beauty of wood so detailed you can’t tell it’s not wood. Only JELD-WEN delivers the beauty of real wood with the low-maintenance durability of fiberglass. Raised moulding, carved features and a true woodgrain appearance come in one door collection with five exquisite designs.

Doors are pre-hung in coordinating jambs of mahogany, oak or fir veneers, and your choice of either a bronze or brass anodized aluminum sill or an actual oak or mahogany sill, all with traditional sill horns. These door units are prefinished in one of seven finish colors to customize any entry.

Doors are sized as: 3'-0” x 6'-8” Sidelights are: 1'-2” x 6'-8”

The following stain colors are available:

**MAHOGANY**

- Mahogany
- Cedar
- Light Oak
- English Walnut
- Walnut
- Natural Oak
- Cherry

Color variation may occur from the actual stain colors shown.

JELD-WEN.COM 13
Built with architectural detail in mind, the raised moulding in Mahogany and the panel profiles in Oak emulate a handmade wood door. The larger space for glass and the correctly registered grain are just two more of the many details that make it difficult to tell this low-maintenance door from a wood door.
